PHONE: 217-774-2721

Email: shelbycohwyadmin@shelbycounty-il.gov

FEE IF APPLICABLE: _____

A minimum of 2 business days is requested before the hauling is expected to occur upon submittal of permit. This permit in no ways guarantees the capacity of the bridge, or that horizontal geometry will allow the passage of a large truck. This will be at the haulers discretion to ensure they will be able to make passage. If the driver notices a load posting on the road or bridge he shall stop immediately and call (217)774-2721. Any load over 80,000 pounds shall have a structural analysis performed by and Illinois registered structural engineer and sent to the County at no expense to the County. If damage occurs to the road, drainage pipes, or structures along the route it shall be at the hauler's expense to fix.
